# **Client Database Patch (Sybase and MSDE)**

## **Sybase Upgrade Procedure**

This procedure includes instructions to upgrade the Saturn client database. This procedure is incomplete without first performing “Workstation Installation and Configuration” Supplement number 4118155.

### **Upgrade Preparation**

1. Ensure Supplement 4118155, Rev. - (Workstation Installation and Configuration) has been completed.
2. Create a share directory on the server.
3. Copy the contents of the Sybase Patch CD to the newly created directory from the CD.

## Sybase Upgrade Procedure

### Workstation Upgrade Procedures

1. Hit CTRL-ESC.
2. Select Start, select Shut Down, then select Logoff.
3. End all task as required.
4. Logon as the local administrator (Logon: administrator Password: NAD123NAD123)
5. Using Windows explorer, map a network drive to the previously shared drive on the server.
6. Go to the mapped network drive.
7. Go to the Sybase directory.
8. At the Sybase ASA 7.0.4 EBF #3421 screen, execute 'Setup.exe'.
